NetSuite – the world's most widely used cloud ERP solution

ORACLE
NETSUITE

The world's leading cloud-based business software* with more than 34,000 custom-ers. NetSuite steers your business growth, from start-up to listed company and even further.

Product highlights

Innovative

NetSuite delivers new innovations twice a year. All its global customers benefit from updates and new technologies at the same time – every NetSuite client has access to the latest release.

Complete and integrated

A wide range of robust, pre-configured ERP, CRM and global finance features allows business-critical processes to be digitalized and automated. An integrated workflow engine and business intelligence enable efficient and transparent transactions cus-tomized to meet business needs.

Forward-thinking and mobile

Developed for forward-thinking businesses: NetSuite is cloud-based, ideal for a mobile and decentralized workforce. NetSuite is built on a dynamic, easy-to-use platform that anyone in a global organization can access at any time, on any device.

Scalable

The system has easy scalability: functionality accelerates as your business grows. Supporting more than 190 currencies, 27 languages and tax compliance in over 100 countries, it enables smooth global expansion for your business.

Security

Managed by Oracle in the Oracle Datacenter and based on Oracle Technology, NetSuite meets the world's highest security standards, maximizing availability and giving you high-performance business software. Our data centers are located all around the world, allowing customers to choose where their data are stored.
