

Position as leading ERP service provider further expanded: Full Speed Systems integrated into Boss Info

Sursee LU / Farnern, July 22, 2022

With the successful integration into Boss Info AG, FSS has taken an important strategic step in strengthening its service portfolio and increasing customer benefits. This sets the course for a long-term, binding and successful future.

Boss Info and Full Speed Systems - strategic expansion of ERP competence

In December 2021, Full Speed Systems AG (FSS), founded by Marcel Merz and Urs Liechti, was acquired by Boss Info AG, which has 8 locations in German-speaking Switzerland. Now the integration has been successfully completed: FSS customers can continue to rely on their accustomed contacts and services in the future, because the approximately 70 employees of FSS optimally reinforce the broad technical expertise of Boss Info, especially in the area of ERP solutions. As of August 1, 2022, FSS will operate under a new legal name: bossinfo.com AG. The legal name change was combined with the relocation of the office premises to Bahnhofstrasse 7a in 6210 Sursee.

Dynamic team provides added value

Through the acquisition, bossinfo.com AG (FSS) has secured direct access to a comprehensive service and solution portfolio for its customers. In addition to the proven Oracle solutions NetSuite and JD Edwards, customers as well as interested parties benefit from direct access to know-how in the areas of human resources and payroll, business intelligence (BI), document management system (DMS), collaboration solutions and especially in the area of ICT and cloud infrastructure services.

Great synergy potential is utilized - for a successful future

For the owners of FSS, Urs Liechti and Marcel Merz, the integration means the ideal succession solution for their professional life's work. «I am still very happy to have placed the FSS Group in good hands and I am convinced that this is a very sustainable and perfect solution for all customers and employees,» says Urs Liechti. Marcel Merz adds: «I am looking forward to the further cooperation and am full of enthusiasm to go into an even more successful future together with Boss Info!»

Like the two founders of FSS, Simon Boss, founder, VRP and co-owner of Boss Info AG and CEO of bossinfo.ch AG, had also recognized the enormous potential of the merger: «In addition to the professional competence expansion, I experience on a daily basis how Urs and Marcel share our company values with their team and how the company cultures ideally

enrich each other. With the further expansion of the ERP solution offering, we were able to take the Boss Info stack to the next level.»

The previous shareholders of Full Speed Systems AG, Marcel Merz and Urs Liechti, continue to support Boss Info AG as co-owners and thus the long-term strategy of the ICT service company.

About Boss Info: ICT for better business | be boss in your business™

The Boss Info team of over 300 specialists is committed to a common goal every day: By using innovative technologies, they digitize the business processes of SMEs with industry solutions, consulting, ICT solutions and services. The consistent implementation of the strategy and the living of the company values - competence, fairness, longevity and commitment - have made Boss Info what it is today: Boss Info is one of the most successful independent providers of business solutions, ICT & cloud services, consulting services and collaboration solutions. The 360° overall ICT offering for companies includes proven in-house developments such as bossERP, bossSalary and bossGO and the Microsoft Dynamics 365 ERP solutions Finance & Supply Chain Management and Business Central, STEPS, as well as the Oracle solutions JD Edwards and NetSuite. DMS and Business Process Management solutions round off the range of services in addition to individual developments and the extensive Microsoft 365 competence.
